Measuring of Solid Slider Doors & Windows

Solid Sliding Door/Window

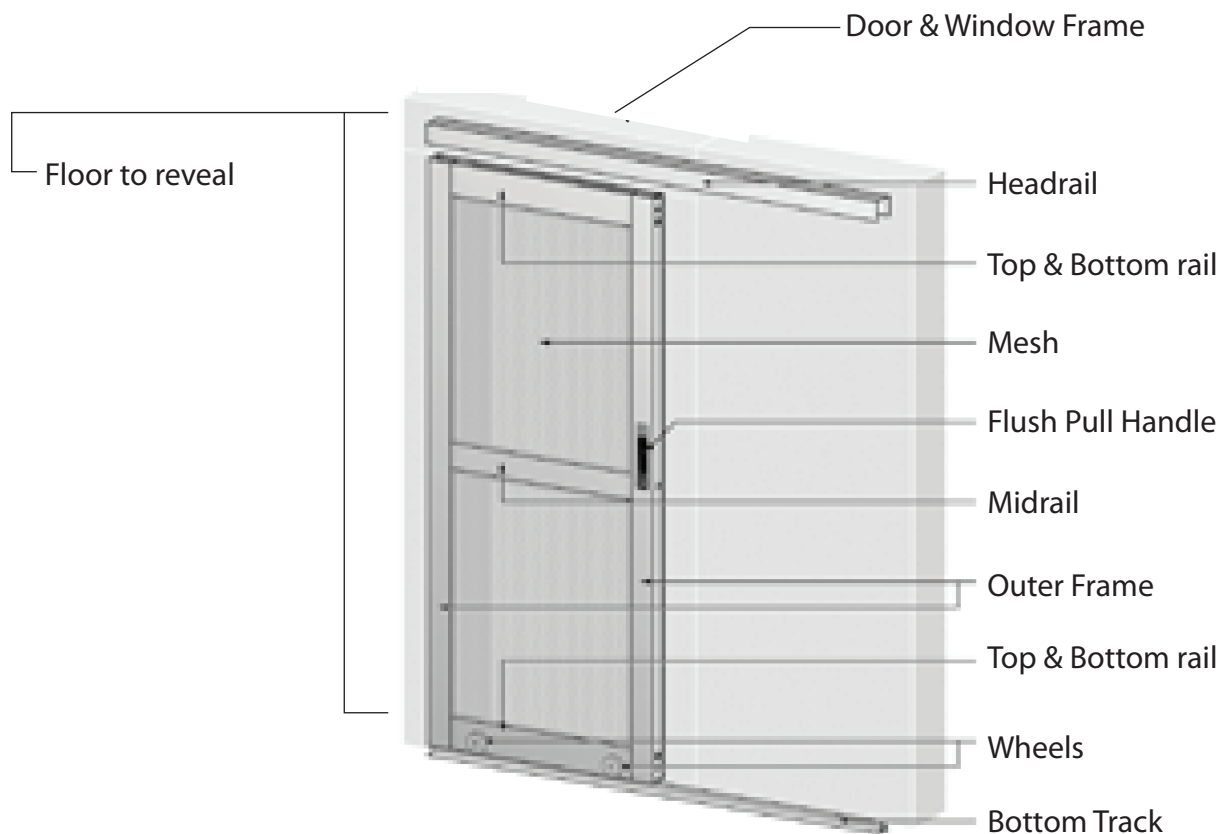

A solid sliding door/window is designed to be retro fitted against existing sliding doors/windows. It comes complete with head rail and bottom track.

Full instructions for fitting are provided.

Measuring for Solid Slider Doors/Windows

When measuring for solid slider doors/windows, measure the following:

- a) Floor to reveal height
- b) Inside measurement of opening section of door/window-complete opening (reveal to reveal/frame to frame)
- c) Frame thickness/reveal thickness on either side of opening.
- d) Indicated on which side the handle locks onto

Lets fresh air in,
keeps insects out!
